

SN62 Series HMMA+TVP Production

Proposal / Solution

(100~300kg/h for HMMA & 300~600kg/h for TVP)

(Specially we can provide related artificial meat product formulations)

30余人 More than 30 staff

主要职能 main function
设备装配、调试、安装试机 Equipment assembly, debugging, installation test machine

单螺杆挤出机
Single Extruder

平行双螺杆挤出机
Parallel twin screw extruder

原元康机械集团公司
OMEGA MACHINERY GROUP

中国国内双金属机筒螺杆研发企业
Bimetallic barrel and screw R&D enterprise in China

中国挤出机核心部件研发第一品牌
Extruder core components R&D first brand in China

上海元康机械出口的双金属机筒
Bimetallic barrels are ready for export

我们用于双金属机筒成型的柴油喷射炉和离心机设备拥有国家专利保护
Our Diesel Injection Furnace and Centrifuge Equipment used for bimetallic barrel molding is protected by the State Patent

SHANGHAI OMEGA MACHINERY

II/ Introduction by

1/ Definition

Vegetable protein meat TVP (textured vegetable protein) is made of vegetable protein as raw material and processed by a special process. It is a category of food with similar characteristics with livestock, poultry, and fish meat in terms of structure, flavor and chewiness.

2/ Development process of plant protein

- 1) Version 1.0: Raw processing materials of soy products such as tofu
- 2) Version 2.0: Tissue protein produced by dry method
- 3) Version 3.0: Vegetable protein meat developed from the tissue protein of high-humidity processing method

At present, our company has obtained stable, reliable production technology and product development and application in the field of HMMA production of version 3.0.

3/ Classifications

- 1) Product types that can be processed in terms of different raw materials
 - a) Grain tissue protein,
 - b) Legume tissue protein,
 - c) Mixed (in material) tissue protein.
- 2) Processable product types in terms of final moisture
 - a) Dry tissue protein: ordinary tissue protein (granules, bars, rods, blocks),
 - b) Drawing protein
 - c) Wet tissue protein: high moisture tissue protein.

4/ Application fields of HMMA

- 1) Meat product processing: high temperature ham sausage, low temperature ham sausage and enema, canned luncheon meat, flavored meatballs, flavored meat patties, dumplings stuffing with stuffed buns, and reconstituted meat particles wrapped in meat sauce.
- 2) Snack food : dried meat, meat strips, meat floss, etc.
- 3) Catering: dine-in catering, catering ingredients, barbecue ingredients,
- 4) Vegetarian: religious and healthy people, monasteries, vegetarian restaurants.

5/ Product features of HMMA

- 1) Fibrous feeling and strong chewing feeling
- 2) Repeated quick freezing and thawing without losing water
- 3) Resistant to cooking, high temperature and high pressure
- 4) Simple and convenient to use

Because the products produced by the high-humidity method are more meat-like and easy to use, they are the future development direction and main force of tissue protein, and will gradually replace dry tissue protein.

6/ HMMA Characteristics available by our machines:

Item	Meat		Pork		Chicken		Fish
	Block shape	Strip shape	Block shape	Strip shape	Block shape	Strip shape	Strip shape
Flavor	√	√	√	√	√	√	√
Color	√	√	√	√	√	√	√
taste	√	√	√	√	√	√	√
Color+taste	√	√	√	√	√	√	√

7/ Total machine system consists of following parts:

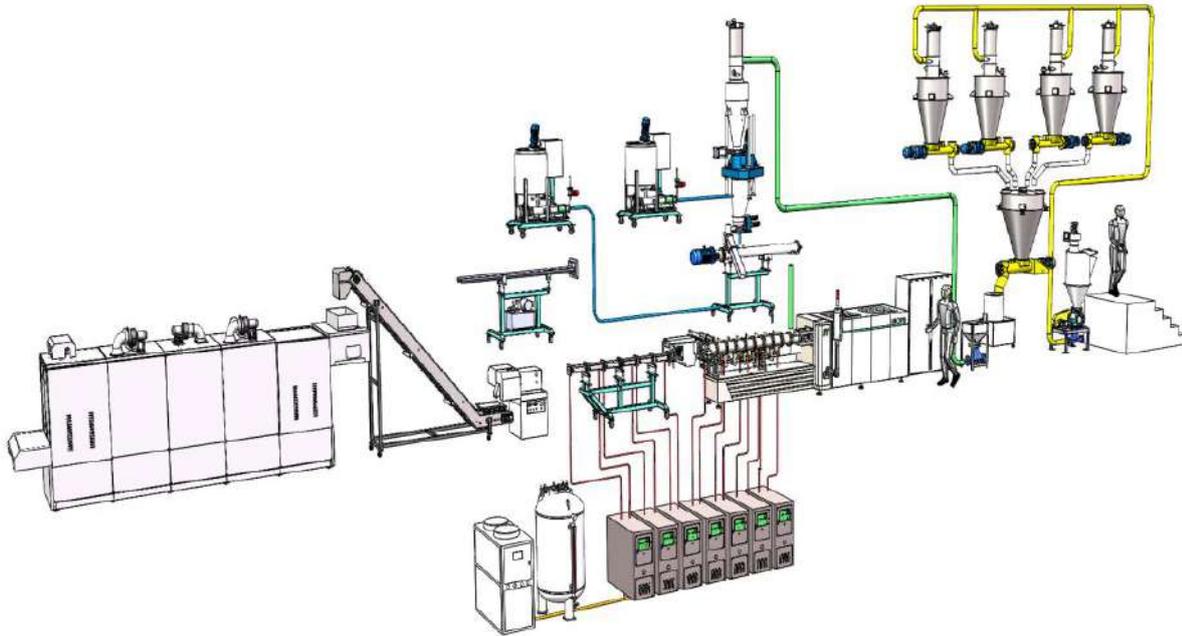

- 1) Raw material mixing and dosing system:including raw material dosing, mixing, transportation and processing.
- 2) Loss-in-weight feeding system:provide accurate and stable feeding for the extruder.
- 3) Material conditioning device: pre-treatment of materials which can be filled with steam, liquid, ingredients etc.
- 4) Twin-screw extrusion system: the core equipment.According to different material formulas,it can realize material processing through different combinations of building block/segmented screws.
- 5) Temperature control molding device: temperature-controllable molding of the materials processed by the extruder, and change about silk-like structure of HMMA through adjusting process parameters.

High-precision temperature control device: Provide high-precision temperature

control conditions for the extruder and the former.

6) Vapor-liquid filling system: Provide high-precision, stable and reliable vapor-liquid supply for the conditioner and main machine processing part.

7) All other auxiliary equipments.

VI/ Brand List

	Components	Brand
1	PLC/HMI	DELTA
2	Control cabinet	RITTAL
3	Frequency inverter	DELTA
4	Main motor	SIMENS
5	Bearing	NSK
6	Low-voltage electrical components	SCHNEIDER
7	Load cell	METTLER TOLEDO
8	Temperature, pressure sensor	GEFRAN
9	Water injection screw pump	NETZSCH
10	Temperature control meters	WEST

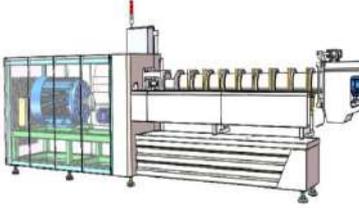

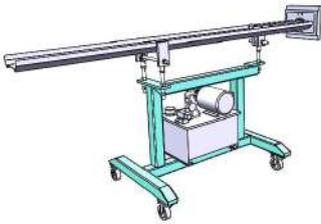

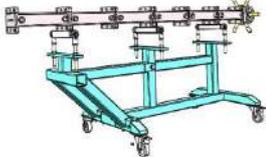

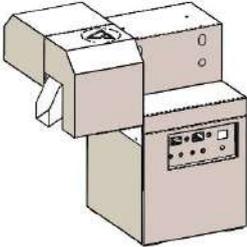

VII/ Information

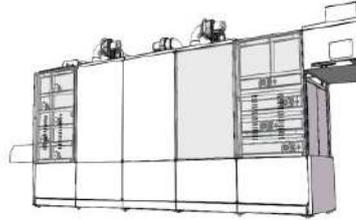

No.	Descriptions	Pictures	Information	Remarks
1	Automatic dosing system	 <p style="text-align: center;">SNZP-I-4</p>	<p>Components:</p> <ol style="list-style-type: none"> 1. Platform 2. manual dust-free feeding station TLZ-1 (for 25kg packaging bags) 3. One-to-four vacuum conveyor ZKS-3 4. Raw material silos (280L) with screw conveyor included-4 sets 5. Weighing batching bin (500L) with unloading conveyor 6. Weighing control system <p>Parameters:</p> <ol style="list-style-type: none"> 1. Voltage: 380V,50Hz 2. Total power: 7kw 3. Size: 3000x3000x6000mm with stairs excluded 4. Weighing module brand: METTKER TOLEDO 5. Batching accuracy: $\pm 0.5\%$ 6. Batching capacity: 800kg/h 7. Material of silo: the parts that contact food is made of SUS304 	1 set (optional)
2	Batch mixer	 <p style="text-align: center;">BFJ-III</p>	<ol style="list-style-type: none"> 1. Voltage: 380V,50Hz 2. Motor power: 7.5kw 3. Spindle speed: 285r/min 4. Single mixing powder volume: 50kg/batch 5. Output: 400-600kg/h 6. Material: the parts that contact food is made of SUS304 7. Dimension: 1410x760x1350mm 	1 set

3	Vacuum conveyer	 <p style="text-align: center;">QVC-3</p>	<ol style="list-style-type: none"> 1. Conveying capacity: 300-1500kg/h 2. Silo volume: 12.0L 3. Working pressure: 0.4-0.6Mpa 4. Compressed air consumption: 720NL/min 5. Material: the parts that contact food is made of SUS304 	1 set
4	Buffer	 <p style="text-align: center;">LC-100</p>	<ol style="list-style-type: none"> 1. Effective volume: 100L 2. Dimensions: 600x600x1250mm 3. Outlet size: DN150 4. pneumatic working 5. Configuration: upper material level sensor and lower material level sensor 6. Material: The parts that contact food is made of SUS304 7. Working pressure: 0.4-0.6Mpa 	1 set
5	Loss-in-weight Feeding silo especially for HMMA	 <p style="text-align: center;">SNWL-III-120SNWL-III-120</p>	<ol style="list-style-type: none"> 1. Effective volume: 120L 2. Material: The parts that contact food is made of SUS304 3. Three-point load cell: 300kg 4. Weighing accuracy: $\pm 0.5\%$ 5. Silo mixing motor: 0.75kw 6. Spherical bucket stirring motor: 0.45kw 7. Feeding motor: 0.75kw 8. Screw diameter: 2-44mm 9. Loss-in-weight metering control system PLC+HMI remote/local intelligent control 	1 set
6	Single-shaft/ axis pre-conditioner	 <p style="text-align: center;">SNTZ-III-168</p>	<ol style="list-style-type: none"> 1. Diameter: 168mm 2. Tempering length: 2000mm 3. Voltage: 380V,50Hz 4. Motor power: 4.0kw 5. Spindle speed: 0-600r/min 6. Material: the parts that contact food is made of SUS304 7. Dimension: 2900x1350x1500mm 	1 set

<p>7</p>	<p>Quantitative water injection device</p>	 <p>SNZS-II-150</p>	<ol style="list-style-type: none"> 1. Effective volume: 150L 2. Heating power: 9kw 3. Mixing power: 0.37kw 4. Water injection pressure 3bar 5. Water injection volume: 0.035-0.35m³/h 6. Screw pump power 0.75kw 7. Flow detection, temperature detection 8. Dimension:700x1200x1800mm 9. Material:the parts that contact food is made of SUS304 contact material SUS304 	<p>1 set</p>
<p>8</p>	<p>High-precision and high-sensitivity temperature control unit</p>		<p>The deeply optimized PID control algorithm provides high-precision temperature control for extruder barrel and former.</p> <p>Components:</p> <ol style="list-style-type: none"> 1/ 4 sets of oil temperature controllers Model: MTC-HH-250B 1) Power: 15KVA 2) Temperature control accuracy: display 0.1°C, ±1°C 3) Medium flow: heat transfer oil 4) Dimension: 870x275x750mm 5) Voltage: 380v/50Hz 6) The maximum temperature is 190°C 2/ 3 sets of water temperature controllers Model: MTC-LH-60A Power: 13.5KVA Temperature control accuracy: display 0.1°C, ±1°C Medium flow: water 4) Dimension: 640x207x550mm 5) Voltage: 380v/50Hz 6) The highest temperature: 120°C 	<p>7 units</p>

14	Shaping machine		Pulling and cutting for TVP products	1 set
15-1	Belt hoister	 <p style="text-align: center;">TSJ-II-400</p>	<ol style="list-style-type: none"> 1.Voltage: 380V/50Hz 2.Total power:0.37kw 3. Width of conveyor belt:400mm 4. Frame material:SUS201 <p>Dimension: 1935x740x1365mm It can be used for big size TVP granules</p>	1 set

15-2	Air conveyor (optional)	 FSJ-1.1	Power: 1.1 kw Pipeline diameter:Φ141mm Capacity: 600-800kg/h Weight: 50Kg It can be used for small size TVP granules	1 set
16	Electric dryer	 SN-D8F5	1. Voltage/frequency: 380v/50Hz 2. Total power: 75.5kw 3. Number of layers: 5 layers 4. Number of heating pipes: 90 5. Center distance of mesh belt: 1020mm 6. Mesh belt material: SUS304 7. Output: 450-650kg/h 8. Dimensions: 8630x1575x2530mm 9. Insulation material: aluminum silicate board	1 set

Remark: The above information and pictures are for reference only, and it is subject to the actual size of the equipment.

VIII/ Contract Terms and Conditions

- 1/ Payment Term: 60% paid by T/T as advance payment with the balance to be paid before shipment by T/T.
- 2/ Delivery Time: Within 100 working days.
- 3/ Demonstration can be arranged to clients before shipment and machines can be shipped after the equipment is approved satisfactory.
- 4/ Seller will dispatch 2 experienced engineers to go for on-site installation, debugging and training. Buyer shall cover the visa application cost, roundtrip air flight tickets, food and accommodations along with usd100/day/person.

Welcome any questions to be discussed, if an inquiry confirmed, our company will show buyer our Quotation file ASAP.
